Summary

MCA student with strong foundations in Data Structures & Algorithms and Full-Stack Development, skilled in C++, Java, JavaScript, React.js, Node.js, Express.js, and MongoDB. Experienced in building web applications and solving software engineering problems through academic and personal projects.

Education

Master of Computer Applications (MCA) <i>Graphic Era (Deemed to be University)</i> Current CGPA: 8.16/10 (till 2 nd sem)	2025 – Present
Bachelor of Computer Applications (BCA) <i>Graphic Era (Deemed to be University)</i> CGPA: 7.65	2022 – 2025
Intermediate (Class 12) <i>T.C.G Public School, Kotdwara</i> Aggregate: 70%	2022

Skills

Programming Languages:

C++, Java, Python, JavaScript

Frameworks & Libraries:

React.js, Node.js, Express.js, Streamlit, Socket.IO

Databases:

MongoDB, MySQL

Tools & Technologies:

Git, GitHub, VS Code, Postman, Scikit-learn, Pandas, NumPy

Core Subjects:

Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Soft Skills:

Problem Solving, Analytical Thinking, Communication Skills, Time Management, Adaptability

Certificates

- AWS Cloud Practitioner Essentials 
- Authoring Visual Analytics-AWS Skill Builder 

Projects

Real-Time Bus Tracking System | Flutter, Firebase

- Developed a real-time mobile application for tracking bus locations and routes using Flutter and Firebase.
- Implemented real-time data synchronization to continuously update bus location information for users.
- Designed a responsive Flutter interface for displaying bus details, routes, and live location updates.
- Integrated Firebase backend services for storing, retrieving and synchronizing bus tracking data.
- Applied asynchronous data handling to provide timely updates without requiring manual refreshes.

Smart Parking Management System | HTML, CSS, JavaScript, MongoDB

- Developed a Smart Parking Management System for automated parking slot allocation and vehicle management.
- Implemented Data Structures including Arrays, Queues, Stacks, Linked Lists, and Hash Tables for efficient parking operations.
- Designed an admin dashboard with real-time parking availability, vehicle search, parking history, and occupancy statistics.
- Integrated MongoDB for secure and persistent storage of parking records and developed a responsive user interface using HTML, CSS, and JavaScript.
